PROFILE

Passionate software engineer with 6+ years experience in user-facing application development. Fascinated by everything UX/UI-related.

EMPLOYMENT HISTORY

Software Engineer, Opendoor

Los Angeles/Remote

Oct 2018 — Present

- Mobile app work in **React-Native/Typescript**, using **Apollo GraphQL**.
- Website features and maintenance using **React** and **Typescript** with a **Ruby on Rails** backend.
- Had an active hand in launching the latest products to help our customers buy and sell seamlessly, including but not limited to: a 100% self-hosted real-time chat service in use by thousands of users monthly, a new hub encompassing both the buyer and seller experience as well as countless other features that are still in use to this day.

Software Engineer, SeeTickets USA

Los Angeles

Dec 2016 — Sep 2018

- Built ticket kiosk iPad application using **Ionic Framework** and **Angular 5**.
- Helped in-progress microservice architecture migration (from .NET monolith), primarily built on **Node.js**, **Express**, **Angular 5** and using the **Serverless** framework as well as the whole AWS deployment stack (CodePipeline, Cloudformation, Lambda).
- Daily bug management and feature additions on lame-duck production system (monolithic program built using VB.net, WAF framework, SQL Server, Javascript, and C#).

Software Engineer, Azzana Consulting

Paris, France

Oct 2014 — Jul 2016

- Developed desktop solutions as well as fully featured websites used by the largest banks in France.
- Created websites from scratch using ASP.Net/HTML/CSS/JS following Google's Material Design.

EDUCATION

Master's Degree, EPITECH

Paris, France

Sep 2010 — Sep 2015

California State University, Long Beach

Long Beach, CA

Oct 2013 — Aug 2014
